

- 1) Download and install [CureControl for Windows](https://www.langmuirsystems.com/downloads) from the Downloads page at <https://www.langmuirsystems.com/downloads>.
- 2) Once the download is completed, double-click it to begin the installation. If you see the following pop-up, select “More info”. Next select “Run anyway”.

- 3) In the dialog box that appears, select “Next”.
- 4) Read and accept the End-User License agreement, then select “Next”.
- 5) Select next to download CureControl in the default location. Select “Change...” if you would otherwise like to download it somewhere else.
- 6) Select “Install” to install CureControl.
- 7) Select “Finish”.
